## Novell eDirectory is first to be SunTone™ certified

Novell NDS eDirectory, is the first directory to complete the SunTone Program Certification. Neither Active Directory, nor the iPlanet Directory have met SunTone requirements for scalability, availability, security, and optimization on the SunTone architecture. Obtaining certification under the SunTone program is another milestone for the only directory that runs on all leading operating systems.

# CORPORATE PARTNERS

## Partnering for Success

Novell is teaming up with top consulting firms and systems integrators to deliver directory-enabled solutions. Computer Sciences Corporation (CSC) is the most recent company to join Novell's CSI Alliance program.

[> read more](#)

## Partner Resources

Novell Developer Labs was created to assist companies in directory-enabling their products. With labs in Provo, San Jose, Boston, and Taipei, we can assist companies at any level.

Novell Education Services offers the Certified Directory Engineer program, which builds on existing certifications, such as CNE®, MCSE, ASE and CCIE—adding a powerful directory component to your qualifications.

Novell Support provides easy access to a variety of technical information, links, software, patches, and drivers, allowing you to answer questions and solve your problems online and on time.

Novell Introduces Powerful

NOVELL HOME

## ISPS/ASPS

### Novell Introduces OnDemand Services

Novell recently introduced Novell OnDemand Services

1.5, new technology to address content and service provisioning—a major growth market for enterprises and service providers looking to supply new value-added services to employees and customers. Furthering the move to deliver powerful technology and expertise in content and service provisioning, Novell has also acquired privately-held Novetrix.
